ATKINSON'S CEMENT.—This Cement has hitherto been manufactured in Yorkshire, and, through long detention at sea, has often proved stale and unfit for use on its arrival in London. By the arrangement now made, the Cement will be manufactured in London, and thus guaranteed to consumers as a fresh and genuine article, by the sole Agents, J. B. WHITE and SONS, Millbank-street, Westminster.

KEENE'S and PARIAN CEMENTS, for internal stucco, are employed very advantageously in place of lime for christmas, architraves, and panel mouldings, and for in-door flooring, instead of stucco. The peculiar properties of PARIAN Cement allow of its being painted or papered upon within a few hours of its application, and thus render it an important substitute for common plastering in those cases where expedition and rapidity of finish are essential.—J. B. WHITE and SONS, Millbank-street, Westminster, Patentees of KEENE'S Cement, Licensees of PARIAN Cement.

PORTLAND CEMENT, as manufactured by J. B. WHITE and SONS, possesses all the properties of the best Roman Cement but has the advantage over that material of wholly resisting frost. When used as a stucco it does not crystalise or turn green in damp situations, and requires no colouring. Employed as an hydraulic mortar for brickwork, it carries from two to three times as much sand to one of cement, and is proved by trial to become harder and stronger in these proportions than Roman Cement with but one measure of sand. This superior cementing power, combined with its eminently hydraulic properties, point it out as the finest material for building on and embankment walls, the lining of reservoirs, cisterns, and baths, and for all purposes where strength and a perfect resistance to water are required.

Manufacturers—J. B. WHITE and SONS, Millbank-street, Westminster, and 30, Canal-street, Liverpool.

PORTLAND CEMENT, solely MANUFACTURED by WILLIAM ASPDIN, (late of the Patentee — Messrs. ROBINS, ASPDIN, and Co. respect) reference to No. 230, page 691; and also Nos. 234 and 235, pages 745 and 781 of "The Builder," for accounts of EXPERIMENTS on the strength of Portland Cements, whereby the great superiority of their Cement is manifest. This Cement has been proved for the last twenty years in the Thames Tunnel to resist the action of water; it is stronger in its compositions qualities, harder, and more durable than any other description of Cement; it does not vegetate, crystalise, or turn green; nor is it affected by any atmospheric influence whatever (the offensive product arising from the heating of iron and lime). It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Brook-street, Ratcliff, Whitehall; also at their Depôt, 6, Hanover-street, Liverpool.

MARTIN'S PATENT
FIRE-PROOF AND ORNAMENTAL CEMENT,
APPLICABLE FOR
ALL INTERNAL PURPOSES WHERE PLASTERING IS REQUIRED.

This invaluable Cement has now been before the public so many years, and obtained so high a standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. MESSRS. STEVENS and MOSS, Bowery-lane, called upon us to observe, that from the greater extent of surface which a given quantity of MARTIN'S will cover, as compared with other Cements for internal use, there will be found a gain of 100 per cent. in material, full per cent. less in price, with an additional saving in labour of 15 per cent., by its allowing about forty minutes for working, being less than one-tenth of the time of other cements of a similar nature, therefore worked with greater facility, making together the enormous saving of full THIRTY-THREE PER CENT., an advantage therefore cannot admit of doubt. Specimens, showing its beauty, hardness, and applicability to all parts and ornamental purposes, may be seen; and the Cement, in any quantity, obtained of Messrs. STEVENS and SON, at their Plaster and Cement Works, 154, Drury-lane, London.—Manufactory, Derwent Mill, Derby.

N.B. This Cement will receive paint or paper in a few hours after the completion of the work by the plasterers.

JOHNS and Co.'s PATENT PERMANENT STUCCO WASH, CEMENT, and PAINT.—The attention of the trade and the public generally is solicited to these very valuable and well-known materials, which, for their beauty, durability, imperviousness, and cheapness, are unequalled. THE PERMANENT WASH, as a substitute for common lime-wash or whitening, is an article which has long been wanting for stucco and brick walls; it is a stone colour, and may be tinted any colour; is perfectly dry in twenty-four hours; will not wash off. A very little inserts does the common washes; and, being a non-absorbent, is admirably adapted for railway stations, open workhouses, schools, barrack purposes, &c. THE CEMENT, from the great reduction in price, and its establishment for interior as well as external purposes, stands above all other materials of its kind; it has no equals qualities; may be painted or papered in a few days; never blisters, cracks, or disagrees with any known or used paint, and may be coloured with a brush and ground. THE PAINT are well known for its spreading to double work of all kinds, and colouring very powerfully. Numerous testimonials, prospectuses, and every particular may be had, on application, at the Manufactory, Nos. 1 and 2, Phillip's-yard, Upper Thames-street, City. A liberal allowance to wholesale dealers.

BELL'S PATENT LIQUID CEMENT is ready for use, and only one-eighth the cost of oil-paint. For beauty it is pre-eminent, giving the finest appearance of FINE CUT STONE. Can be used in case as fresh flowing plaster, or any other plastering, and will prevent the walls to work or Efflorescence. In shades of L. B. and S. work, as in the case first, more inclusive.

PATENT MINERAL PAINTS.

Invaluable for champions, beauty, and permanence; just half the cost of other paints, always ready for use, will keep good for years, and therefore well suited for exportation. Brilliant tints, in a rich brown, 2s. 6d.; more rich and lasting colours, 3s. per gallon.

G. BELL and Co., 8, Wellington-street, Queen-road, Chelsea.

THE PARIAN CEMENT, for INTERNAL STUCCO, which you supplied at Messrs. J. & S. HOBLEY'S warehouse and dwelling in Wood-street, Grosham-street, in the City, has been used through out the premises, in every story; altogether about ten thousand yards superficial, chiefly on the walls, walls and a small portion upon timber partitions, and done with the most perfect and satisfactory result. I feel it also necessary to observe, that the plasterers' work was also set invariably sound on the next day by the painters, thereby enabling me to get the buildings complete in the shortest possible time. I am also, from the experience of the establishment, I can, therefore, of opinion, that the cost of this new material is a most valuable feature in building operations, and fully justifies that which I may term its undoubted, viz., that it was an extraordinarily successful. I think it right to mention that I am at the present time having a great extent of similar work executed at Sandringham, the property of Lord —, where time and the quality of this work are of the utmost importance.

(Signed) JNO. WALLEN, Architect, London.
